Problem solver with a passion for craftsmanship

## SUMMARY

Senior Frontend Engineer with 5+ years of experience building enterprise-scale web applications using React, Next, TypeScript, GraphQL and Micro-Frontend architecture. Specialized in scalable UI platforms, backend integrations, authentication systems, and performance optimization.

Experienced in leading cross-functional teams, modernizing legacy applications, and delivering secure, high-performance solutions in large enterprise environments.

## SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript, Jest, WCAG  
**Backend & Database:** Node.js, GraphQL, MongoDB, SQL  
**Architecture & DevOps:** Micro-Frontends, Docker, Jenkins, Spinnaker, GitHub Actions, Azure Data Factory  
**Tools:** Webpack, SonarQube, Veracode, Grafana, Git  
**AI:** Codex, Copilot, Prompt Engineering, AI integrations

## EXPERIENCE

### **UST, Canada – Lead Developer**

July 2023 – April 2026 (Full Time)

- Led the development of the Albertsons Partner Portal, owning the Shell Application (Parent Micro-frontend) and a Partner/Vendor micro-frontend integrated into the platform.
- Architected and developed core modules including user onboarding, Notifications, Announcements, Case Management System, and a Help Center integrated with ServiceNow articles and AI Chatbot.
- Designed and implemented dynamic micro-frontend onboarding and runtime loading strategies, integrating and managing 9 independent MFEs within the shell.
- Built and managed a GraphQL middleware layer to orchestrate backend services and simplify frontend data consumption.
- Implemented Power BI embedded analytics and DocuSign integrations, enabling in-app report visualization, dynamic template customization, and automated envelope generation for thousands of users.
- Led an offshore team of 6 developers while enforcing quality and security compliance through SonarQube and Veracode, and collaborating with Product Owners and customers to deliver scalable, business-aligned solutions and UX improvements.

## UST, India – Frontend Developer

February 2021 – July 2023 (Full Time)

- Developed enterprise applications for quality inspection, reporting, and warehouse shipping operations across Albertsons distribution centers.
- Built scalable UI modules and reusable components using React, TypeScript, Redux, and Material UI to support complex business workflows and validations.
- Designed dynamic dashboards, forms, and order management workflows while integrating backend APIs for order updates and tracking.
- Supported Azure Data Factory (ADF) workflows for data transformation and synchronization between legacy Oracle systems and Azure SQL Server.
- Contributed to CI/CD workflows, automated testing, and maintainability using Jest, React Testing Library, Jenkins, and Spinnaker.

## Freelance Developer – Full Stack

April 2019 – January 2021

- Developed and customized web applications and game platforms (Facebook instant games and HTML5 Games) for clients using JavaScript, React, and PHP.
- Configured Linux-based VPS environments, deployments, and application hosting.

## OTHER PROJECTS

### Surrey Happy Hourz – Menu & Happy-Hour Search Platform

- Built and deployed a platform that compares 2,300+ menu items across 100+ Surrey restaurants by price and current happy-hour availability
- Technologies: TypeScript, Next.js,, PostgreSQL, Oracle Cloud

### UnSignedz – Anonymous Messaging Platform

- A web application that allows users to share personalized links and receive anonymous feedback/messages. Includes an admin dashboard with customizable UI, user management, moderation controls, and multi-language support.
- Technologies: TypeScript, Next.js, PostgreSQL, Oracle Cloud

## EDUCATION

## Bachelor of Technology in Computer Science and Engineering

August 2016 – July 2020 | Kerala, India

## CERTIFICATIONS

## Red Hat Certified Engineer (RHCE)

November 2020 : Certification ID: 190-251-470
