SUMMARY

Senior Frontend Engineer with 5+ years of experience building enterprise web applications using React, Next.js, TypeScript, GraphQL and Micro-Frontend architecture. Led frontend delivery for a 6-engineer team and collaborated with 50+ engineers across a 9-micro-frontend platform supporting 10,000+ users across thousands of vendors.

Experienced in frontend platform development, API and enterprise integrations, authentication and SSO, automated testing, production troubleshooting, CI/CD, and cross-team technical delivery. Additional hands-on experience building full-stack applications with Next.js, Node.js, and PostgreSQL.

SKILLS

- **Frontend:** React, TypeScript, JavaScript, HTML, CSS, Redux, Vite, Tailwind
- **Frontend Architecture:** Micro-Frontends, Webpack Module Federation, Runtime MFE integration
- **API & Backend:** GraphQL, Node.js, Express, Next.js, REST APIs
- **DevOps & Observability:** GitHub Actions, Docker, Grafana, Grafana Faro, SonarQube, Veracode, Jenkins, Spinnaker
- **Enterprise Integrations:** Power BI Embedding, DocuSign, ServiceNow, MSAL / SSO, Azure Data Factory
- **Additional:** PostgreSQL, MongoDB, WCAG, Codex, Copilot, AI Integrations

EXPERIENCE

UST Global, Canada - Lead Developer

July 2023 - April 2026 (Full Time)

- Led the development of the Albertsons Partner Portal, owning the Shell Application (Parent Micro-frontend) and the Partner/Vendor micro-frontend integrated into the platform.
- Developed core modules including user onboarding, Notifications, Announcements, Case Management System, and a Help Center integrated with ServiceNow articles.
- Implemented dynamic micro-frontend onboarding and runtime loading strategies, integrating and managing 9 independent MFEs within the shell.
- Built and maintained GraphQL middleware and delivered enterprise integrations including ServiceNow, Power BI Embedded, DocuSign, and an AI chatbot backed by Google Vertex AI APIs.
- Led a 6-developer frontend team through code reviews, mentoring, onboarding, technical task breakdown, and design discussions while collaborating with 50+ engineers across multiple micro-frontend teams.
- Maintained 85%+ automated test coverage across team repositories using Jest and React Testing Library, while supporting biweekly production releases, monitoring, security scans, and CI/CD workflows.
- Diagnosed and resolved complex production issues involving MSAL authentication, SSO identity conflicts, and Power BI integrations for a platform serving 10,000+ users across thousands of vendors.

UST, India - Frontend Developer

February 2021 - July 2023 (Full Time)

- Developed enterprise applications for quality inspection, reporting, and warehouse shipping operations across Albertsons distribution centers.
- Built scalable UI modules and reusable components using React, TypeScript, Redux, and Material UI to support complex business workflows and validations.
- Designed dynamic dashboards, forms, and order management workflows while integrating backend APIs for order updates and tracking.
- Supported Azure Data Factory (ADF) workflows for data transformation and synchronization between legacy Oracle systems and Azure SQL Server.
- Contributed to CI/CD workflows, automated testing, and maintainability using Jest, React Testing Library, Jenkins, and Spinnaker.

Freelance Developer - Full Stack

April 2019 - January 2021

- Developed and customized web applications, Facebook instant games and HTML5 Games for clients.
- Configured Linux-based VPS environments, deployments, and application hosting.
- Technology Includes JavaScript, React.js, Next.js, PHP and Linux.

OTHER PROJECTS

Surrey Happy Hour - Menu & Happy-Hour Search Platform

- Built and deployed a platform that compares 2,300+ menu items across 100+ Surrey restaurants by price and current happy-hour availability.
- Technologies: TypeScript, Next.js, PostgreSQL, Oracle Cloud

Unsigned - Anonymous Messaging Platform

- A web application that allows users to share personalized links and receive anonymous feedback/messages. Includes an admin dashboard with customizable UI, user management, moderation controls, and multi-language support.
- Technologies: TypeScript, Next.js, PostgreSQL, Oracle Cloud

Minimal YTube - Chrome Extension

- Built a Chrome extension that removes non-essential elements from YouTube pages and keeps users focused on the currently playing video.
- Technologies: JavaScript, HTML

EDUCATION

Bachelor of Technology in Computer Science and Engineering

August 2016 - July 2020 | APJ Abdul Kalam Technological University, Kerala, India

CERTIFICATIONS

Red Hat Certified Engineer (RHCE)

November 2020 : Certification ID: 190-251-470

Certified SAE 5 Practitioner

April 2022 : Certification ID: 45495230-929
